SILVER M-CLASS TRUCKS

Silver M-Class trucks optimize turning ability with a refined structure and distinctive contours. A perfect amount of ground clearance, an exceptionally strong construction and dynamic components contribute to the overall quality, stability and smoothness of the M-Class. The performance level of the Silver M-Class easily meets and exceeds the high impact demands of a skateboard truck.

A NEW LEVEL OF PERFORMANCE.

S

SILVER S-CLASS TRUCKS

The design of the Silver S-Class was based on the traditional skateboard truck, but leaves tradition behind with its high level of quality and performance. Fluid turning geometry, high endurance bushings, smooth finished hangers and a tight, compact stability make S-Class trucks ideal for both technical and powerful skateboarding. The S-Class trucks advanced features, extra strength components and legendary design will satisfy skaters of all skill levels.

A

SILVER A-CLASS TRUCKS

Designed for a precise technical feel and ultimate control. Silver A-Class trucks are incredibly light with a low profile design and an exact geometrical construction for seamless turning. The innovative inverted kingpin and exclusive axle caps together with extra strength, smooth finished hangers and high endurance, responsive bushings complete the A-Class package. Perfect for all aspects of skateboarding.
